REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest the invention as recited in claims 1, 6-11, 16-21, 23 and 36-44 of the instant invention including, *inter alia*, a medical robotic system including a first medical device, a first input device that can be moved a first input distance to move the first medical device, a second input device that can be moved a second input distance to move the first medical device where the second input distance is greater than the first input distance by an amount and a feedback device that provides a greater force feedback to the first input device than to the second input device, which indicates the amount of difference between the first and second input distances. The previously applied prior art, Tajima et al., U.S. Patent No. 5,855,553, lacks the feedback device as outlined in the instant invention. Tajima et al. do disclose a visual feedback 107 that is representative of an image of a diseased part (image signals 406 and 407 in Figure 5), but it does not indicate the difference between first and second input distances from a first and second input device. Furthermore, Tajima et al. are silent as to a feedback device that provides a greater force feedback to a first input device than to a second input device. As noted above, the feedback 107 of Tajima et al. only depict diseased parts and does not provide feedback of distances. Other prior art references cited by applicant (Salisbury, Jr., et al., U.S. Patent No. 6,522,906 and Moll et al., U.S. Patent No. 6,659,939) also lack first and second input devices and a feedback device that indicates the amount of difference between first and

second input distances. Accordingly, claims 1, 6-11, 16-21, 23 and 36-44 are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
